- VSCode & Terminal
- Adobe Creative Cloud
- Mac & Windows

WORK

Can I Watch It?
https://kheeb.github.io/can-I-watch-it/
- Tired of searching through subscription services to find the movie you've been looking for? It's been so long to find the film, you fell asleep within the first 5 minutes? Here is your fix! A simple way to discover what subscription services offer the movie you've been searching for!
- HTML, CSS, jQuery, Materialize, Web API

Hourly Work Planner
https://github.com/giovannaruggio/day-planner
- This project includes a rework of starter code to create an application that allows for an individual to create schedules using a daily planner. The current date is displayed at the top of the page and as the hours go by, the time-blocks indicate whether the hour is in the past, present, or future. Enter your todos into the text areas, save your input with the save button in the far right column, and go through your day with ease!
- HTML, CSS, jQuery, Bootstrap

Password Generator
https://giovannaruggio.github.io/password-generator/
- This project includes a rework of starter code to create an application that enables an individual to generate random passwords based on criteria selected such as number of and type of characters. Here's to never getting your Instagram hacked again!
- HTML, CSS, Javascript
